TECHNICAL SHEET **184**

CODE 2.911.

spray san Mould killer

GENERAL PROPERTIES

SPRAY SAN is a concentrated solution containing specific broad-spectrum chemical agents which eradicate the anti aesthetic dark patches caused by moulds, fungi & algae on walls & grout.

The product is ideal for cleaning and restoring interior/exterior surfaces.

The “whitening” effect is visible within a short time after application.

INSTRUCTIONS

Application:

- Do not scrape mould before using SPRAY SAN.
- Mould, fungi & algae: use the spray can to apply a homogeneous layer on the whole surface. Apply at a distance of about 25-30 cm abundantly wetting the contaminated area. Ensure the wall is perfectly dry & remove any residues with a brush. If the surface is particularly unsound apply a second hand to restore the substrate in depth. After having treated the wall apply one of our AB-PAINT line mould resistant paints.
- Wear gloves; protect *eyes & face* during application.
- Splashes on skin must be washed off immediately with soap & plenty of water.
- Do not spray on plants, material or metal; rinse immediately if this occurs.
- NB: certain colours may “whiten”, in this case recoat with products from the AB-PAINT line. If SPRAY SAN enters into contact with acids it will expel toxic gases.
- Store in cool premises away from sunlight. Said conditions will guarantee efficacy for a year.
- Keep out of the reach of children.

Refer to the PSDS for further details.

The data herein were correct at the time of Quality Control and refer to standardized environmental conditions. The same are to be considered as a guide.
